

## MAC LESSON #82

### LEARN MORE ABOUT YOUR MAC

There is an easy way to get access to all kinds of information about your Mac. You'll find it under the Apple menu. Click anywhere on the Desktop to bring up the Finder view. Next, click on the Apple icon on the left side of the Finder menu bar, and open the first selection, About This Mac.

In the About This Mac window you'll see the version of the Mac Operating System your Mac uses, the speed of the processor in your Mac, and the amount and speed of the installed RAM.

Click on the More Info button and a wealth of information is instantly at your fingertips. You'll find everything from information on your hard drive to the files that open at startup.

Take the time to go through About This Mac - you'll be amazed at what you'll learn.
