

## **MAC LESSON #97**

### **SWITCH QUICKLY BETWEEN OPEN APPLICATIONS**

To switch quickly among open applications in OS X: Press and hold the Command key, and then tap on the Tab key until the icon for the desired application is highlighted. Release the Command key and the selected application is now brought to the front of the screen.

OS X Jaguar highlights the icons in the Dock, while OS X Panther and Tiger display oversized icons in the center of the screen.
