

## VISTA LESSON 25

### Remove Names From Internet Explorer 7 Title Bar

Inserting a company name into my Internet Explorer 7 title bar is something that really cheeses me off! Why should I have to look at what amounts to a free add on my title bar? If you're like me, you'll want to get rid of it, and here's how to do it.

Click on Start, Run, and type REGEDIT and press the Enter key. You are now in the Registry Editor Program. Here's what to do next.

Open HKEY\_CURRENT\_USER and then open Software, then Microsoft, Internet Explorer, and finally open Main.

In the right pane you'll see a string value called "Windows Title." Click on it once to highlight it and then press the Delete key. Now close the Registry Editor. The next time you open I.E. 7 the freebee ad should be gone.
